ERP IMPLEMENTATION FOR MUFAMO TRADING COMPANY LIMITED | Link   ERPNext, Python, MariaDB, Frappe Framework

- Led the end-to-end implementation of an ERPNext system tailored for Mufamo Trading Companys unique business processes.
- Customized modules to align with operations in accounting, inventory, and supply chain management, ensuring seamless integration across departments.
- Designed and configured workflows to automate business processes, reducing manual effort and enhancing operational efficiency.
- Conducted user training sessions, enabling employees to maximize the ERP systems potential with minimal support.
- Oversaw data migration from legacy systems, ensuring accurate mapping and preservation of critical business information.
- Delivered post-deployment support, promptly resolving issues and providing ongoing system optimizations to meet evolving business needs.

ERPNEXT IMPLEMENTATION FOR TECHNICAL UNIVERSITY OF MOMBASA ENTERPRISE LIMITED (TUMEL)

ERPNext, Python, Frappe Framework, MariaDB

Played a key role in the implementation of ERPNext at TUMEL to streamline operations in manufacturing and supply chain management for plastic products.

Customized ERP modules to handle manufacturing workflows, from raw material procurement to finished goods production.

Developed and configured supply chain features to optimize inventory management, supplier coordination, and order fulfillment processes.

Supported additional operational areas, including financial management, procurement, and reporting, ensuring a holistic system rollout.

Facilitated user training sessions to onboard staff and enhance system adoption for day-to-day operations.

Delivered post-deployment support to ensure smooth system functioning and resolved issues promptly to meet user expectations.
